

OKHotshot @NFTHerder Sat Dec 17 13:02:16 +0000 2022

1/ Turns out Donald Trump minted a thousand of his own nfts to his vault wallet

Keeping a giant portion of the most rare nfts in his collection for himself

The 2nd minted nft was a rare 1-of-1, the chances ... <https://t.co/3m0MQGQydp>

* Donald Trump admin wallet mints first 1000 nfts in batches of 10 txs

nfts are minted to his vault wallet for free

2/ The vault wallet, a gnosis safe, was created on 2022-12-14. A day before the DT nft launch

On launch day a DT funding wallet sent matic to a DT admin wallet. Which then minted 1k nfts to the gnosis safe: [0xfb65415Ca83B69DA9bC56B4C9C2334fa402baCd7](https://t.co/QLvIcA5p6X) <https://t.co/QLvIcA5p6X>

* Donald Trump vault wallet creation

twitter.com/NFTHERDER

3/ That Donald Trump wallet minted 47 of the 179 1/1 and 21 of the 70 autographed nfts. He owns 26% of 1/1s and 28% of autographed

0.40% have a 1/1 trait and only 0.16% have an autograph trait. These are the most rare and valuable nfts in the collection .. <https://t.co/StjfJQprAy>

Here you can see the DT vault wallet holdings on OpenSea[.com] <https://opensea.io/0xfb65415Ca83B69DA9bC56B4C9C2334fa402baCd7>

AFAIK this was not communicated prior to the launch and each nft doubles as an entry for their sweepstakes

4/ Looking further we find that all metadata and artwork are centrally stored off-chain. Ppl that have access to the domain/storage can change properties and artwork without being able to verify this on the blockchain <https://t.co/mEQlegMuf1>

22. tokenBaseURI

    }
  ]
}
  
```

All Donald Trump nft metadata and artwork all centrally stored off-chain

whitor.com/nftwonder

5/ Been made aware that the site mentions only making 44k nfts available. However, it doesn't mention minting the remaining 1000 to their own wallet and taking 26% of 1-of-1 rares and 28% of autographed rares

They could've simply reserved the remaining 1k <https://t.co/yFgkCEzHyV>

How many different cards are there?

There is a maximum of 45,000 NFTs available to be minted during the Sweepstakes Entry Period, including a maximum of 44,000 NFTs available for purchase during the Sweepstakes Entry Period.

Extra outline on how they minted the first thousand Donald Trump nfts to the gnosis safe. * buyers had a strict limit of a 100 max nft per purchaser/household. <https://t.co/akwFJMxWyG>

1) Operator creates DT_45_Token (the nfts) and Minter contracts (to mint the nfts)

2) Operator uses Admin_mint minter contract to mint the nfts

3) Operator uses Admin_mint function to mint a 1000 DT nfts to a gnosis safe

4) The DTAdmin_mint wallet is funded by the same funder wallet funded Operator wallet

6/ The GnosisSafe is also receiving part of the royalties. So far it has received just over \$631k usd in \$eth

Approx. \$24k usd has been wash traded using this collection. And the single biggest loss is -\$4,281 on Trump Card #12585 <https://t.co/QVilTGCq2W>
