It made several mistakes during the demo, much worse than Google's Bard mistake.

Here's what Bing AI got wrong:

Completely made up information about the "Bissell Pet Hair Eraser Handheld Vacuum".

Worst of all, Bing AI completely messes up a summary of a financial document, getting most of the numbers wrong.

According to Bing, "Gap Inc. reported operating margin of 5.9%...", even though "5.9%" doesn't appear anywhere in that document. https://t.co/Xx1yETwR1R
