10 free websites that are so valuable they feel illegal to know:

1. TinyWOW:

Get free versions of tools you usually pay for. Includes free versions of:

- Adobe Acrobat Pro (PDF editor)
- Photoshop (image editor) <https://t.co/dlIPhyWVqi>

2. Jenni AI:

An AI auto-writing tool that automatically writes your essays and emails for you.

All you have to do is give it a title and a couple of sentences. <https://t.co/wHRrjvvB1U>

You Write, Jenni Completes

Supercharge your writing with the most advanced autocomplete.

3. Temp-mail

Temp-mail gives you a temporary email and inbox to help you sign up to a website and avoid all the spam down the line.

<https://t.co/9eHY9ElzAc>

4. Quillbot:

Quillbot is a paraphrasing website that rewrites everything as plagiarism free text.

Super handy if you're in college. <https://t.co/uXUR4jFelr>

5. Loom

A nifty little tool that lets you record your screen and yourself at the same time, so you can explain things just the way you want to. <https://t.co/9dZyFsytSz>

6. Otter AI:

Have trouble taking notes in meetings?

Otter records your meetings and automatically transcribes them to text. <https://t.co/lvbZ2DIOZQ>

Ollie Why Otter.ai Pricing Download Resources Contact Sales Log In Try Otter.ai Free

Use Otter your way

Engage more with meeting participants without the worry of taking notes, refer back to Otter's real time transcription so you never miss a word, and access, annotate, and share notes for better collaboration.

Lisa Smith
10:04 AM

It's so accurate that it will track your meetings seamlessly. You can easily edit, **annotate** and share the notes.

00:33

7. Pexels:

An awesome website that lets you download high quality stock images for all your work and personal projects.

<https://t.co/aabwMZbvJb>

Pexels Search for free photos Explore License Upload Join

8. Removebg:

An insane tool that lets you easily remove the background from your image and add in any background you like.

<https://t.co/e3cl178nt8>

Just Picture It!

People Products Animals Cars Graphics

Original → Removed background → New backgrounds

Greeting cards, customized designs & more

9. Convertio:

This website lets you convert files to any format you want for free. <https://t.co/vPkIZqhE7Y>

File Converter
Convert your files to any format

9. Microcopy

An awesome resource that helps you find persuasive headlines and slogans. <https://t.co/1RdmLmQR7m>

There are billions of galaxies filled with billions of stars. Each star has the potential to have planets orbiting it. Does life exist on some of those planets? In this module, students discover how scientists find planets and other astronomical bodies through the wobble (also known as Doppler spectroscopy or radial velocity) and transit methods. Students compare zones of habitability around different star types, discovering the zone of liquid water possibility around each star type. Finally, students explore how scientists use spectroscopy to learn about atmospheres on distant planets.

first is to study the effects of exposure to microgravity on biological systems to reduce the risks of manned space flight. The second is to use the microgravity environment to broaden scientific knowledge about the influence of gravity on living systems.
